

TRAN NGOC KHANG

WEB Developer

Final-year student Expected graduation: 08/2026

khangpropc345@gmail.com 0963 860 721 github.com/KhangT05 Thoi An Ward, HCMC

SUMMARY

Final-year Information Technology student specializing in Web Application development. My goal is apply the knowledge gained from my studies and particle experience become to a professional fullstack engineer. With my knowledge, I enjoy solving logic problems and creating the best user experience for users. I also spend time learning new technologies and best practices to become a better engineer.

WORK EXPERIENCE

Intern Web Developer

03/2026 – 06/2026

ITD Group · Ho Chi Minh City, Vietnam

- Built and maintained UI components and pages using Next.js and TypeScript, consuming REST APIs with SWR for data fetching and caching.
- Developed backend modules and RESTful API endpoints with C# / ASP.NET Core on top of the ABP Framework.
- Wrote EF Core migrations and participated in code review via GitLab MR workflow.
- Contributed across the full development lifecycle, including requirements analysis, feature development, code reviews via GitLab, and deployment through GitLab CI/CD pipelines.
- Used AI tools (Claude, ChatGPT) to accelerate API design, authentication flow research, and engineering decisions — applied output critically with manual validation before committing.

Tech Stack: Next.js · TypeScript · C# · ABP Framework · EF Core · MSSQL

PROJECTS

Fashion_clothing · Personal Project

01/2026 - Present

Laravel · MySQL · Tailwind CSS

Full-stack e-commerce application covering product management, order processing, and customer accounts.

- A Fashion Clothing e-commerce with full CRUD product listings, handling customer accounts, and processing orders.
- Implemented authentication, RESTful resource controllers, Eloquent ORM with MySQL.
- Designed schema, wrote migrations, and handled all deployment configuration independently.
